DRY

DRY function: Make dehumidifying in the room when the unit is working in the "DRY" mode

12 Hour timer: Use the timer function to set on, or off.

Easy clean design: The panel is easy to wash and the airflow vents can be detached without any special tools for quick cleaning of the inside of the air conditioner

Intelligent air: With twin-blade technology, the airflow can be adjusted not to blow directly to human body, so preventing people from the air conditioner symptom

Anti-mold filter: Catches most small particles and remove unpleasant odors effectively

4 Fan setting: Select the fan speed LO, MED, HI, AUTO

Child lock: Avoid the child's wrong operation on the remote controller.

2. Specifications

For indoor units only:			HSU-09HEA03/(BP)	HSU-12HEA03/(BP)
POWER SUPPLY			VM	VM
NOMINAL DISTRIBUTION	Phase		1PH	1PH
	Frequency	Hz	50	50
SYSTEM VOLTAGE	Voltage	V	220	220

NOTES

- 1 Nominal cooling capacities are based on: indoor temperature 27°CDB/19°CWB * outdoor temperature 35°CDB/24°CWB * refrigerant piping length: 5m * level difference: 0m.
- 2 Nominal heating capacities are based on: indoor temperature 20°CDB * outdoor temperature 7°CDB/6°CWB * refrigerant piping length 5m (horizontal) * level difference 0m.
- 3 Capacities are net, including a deduction for cooling (an addition for heating) for indoor fan motor heat.
- 4 Units should be selected on nominal capacity. Maximum capacity is limited to peak periods.
- 5 The sound pressure level is measured in an anechoic room at 1m distance from the unit. It is a relative value, depending on the distance and acoustic environment. For measuring conditions: please refer to item 8 of this chapter.
- 6 The sound power level is an absolute value indicating the "power" which a sound source generates.
- 7 Energy label: scale from A (most efficient) to G (less efficient).
- 8 The energy label Directive 2002/31/EC will enter into force once the relevant measurement standard will be published in the European official Standard.
- 9 Annual energy consumption: based on average use of 500 running hours per year at full load (= nominal conditions)

3 Remote controller lists

Model	HSU-09HEA03/(BP)	HSU-12HEA03/(BP)
YR-M13	Y	Y

4 Sensors lists

INDOOR UNIT		
type	Description	Qty
Room sensor	It's used for detecting room temperature	1
Pipe sensor	It's used for detecting temperature of evaporator	1

5 Dimensional drawings

Indoor unit

Outdoor unit

6 Operation range

Heating mode

8.Wiring Diagrams INDOORUNIT

Outdoor unit

CAUTION: The ① can be capacitor board or the capacitor with a clip, which are optional for different unit. The ② are optional for different unit. In the module board, the "CN1, CN2" is for "9000BTU" units; The "CN101, CN102" is for "12000BTU" units.

**WARNING
CAUTION**

DON'T TOUCH CAPACITOR, EVEN AFTER PLUG-OFF (DANGER OF ELECTRIC SHOCK)

The capacitor retains high voltage even after the plug-off. For your safety, be sure to wait at least 5 minutes. after plug off and use a tester to confirm the voltage between connector P and N(on module board) is less than DC 10V before start servicing.

REMOVAL OF THE SOCKET CONNECTOR

Socket connector marked with ✖ has lock catch, when removing, press the lock catch and pull it backward.

LOCK CATCH

Operation mode	COOL	DRY	HEAT
Remote controller			
Display board			

2. SWING display

3. FAN SPEED display

4. HEALTH display

5. POWER/SOFT display

6. LOCK display

Clock set

When unit is started for the first time and after replacing batteries in remote controller, clock should be adjusted as follows:

Press CLOCK button, "AM" or "PM" flashes.

Press Δ or ∇ to set correct time. Each press will increase or decrease 1 min. If the button is kept depressed, time will change quickly.

After time setting is confirmed, press SET, "AM" and "PM" stop flashing, while clock starts working.

NOTE: Cooling only unit do not have displays and functions related with heating

Hints

After replacing with new batteries, remote controller will conduct self-check, displaying all information on LCD. Then, it will become normal.

Display board

7. SIGNAL SENDING display

8. TIMER OFF display

9. TIMER ON display

10. CLOCK display

11. TEMP display

12. POWER ON/OFF

Used for unit start and stop.

13. MODE

Used to select COOL, DRY, HEAT operation

14. FAN

Used to select fan speed AUTO, HI, MED, LO

15. HOUR

Used to set clock and timer setting.

16. SWING

Used to set auto fan direction.

17. POWER/SOFT button

18. LOCK

Used to lock buttons and LCD display.

19. TEMP.

Used to select your desired temp.

20. SET

Used to confirm timer and clock settings.

21. TIMER

Used to select TIMER ON, TIMER OFF,

22. CLOCK

Used to set correct time

23. RESET

Used to reset the controller back to normal condition.

24. HEALTH

Used to operate the healthy function

25. Singal receiver hole

26. Ambient temp. display

When receiving the remote control signal, display the set temperature and in the rest time the room temperature is displayed and this room temperature is only for reference.

14 Installation

Indoor unit installation drawings

How to remove the air filter.

Open the inlet grille by pulling it upward.

Push up the filter's center tab slightly until it is released from the stopper, and remove the filter downward.

How to Attach the air filter.

Attach the filter correctly so that the "FRONT" indication is facing to the front. Make sure that the filter is completely fixed behind the stopper. If the right and left filters are not attached correctly, that may cause defects.

Close the inlet grille.

Outdoor

Model	35 class
Max.allowable length	Cooling only: 20m Heat pump: 25m
Max.allowable height	15m
Additional refrigerant required for refrigerant pipe exceeding 5m in length	16g/m
Gas pipe	O.D. 9.52
Liquid pipe	O.D. 6.35

*Be sure to add the proper amount of additional refrigerant.
Failure to do so may result in reduced performance.

Arrangement of piping directions

Where there is a danger of the unit falling, use foot bolts, or wires.

- Fix the unit to concrete or block with bolts(\varnothing 10mm) and nuts firmly and horizontally.
- When fitting the unit to wall surface, roof or rooftop, fix a supporter surely with nails or wires in consideration of earthquake and strong wind. The distance between the indoor unit and the floor should be more than 2m
- If vibration may affect the house, fix the unit by attaching a vibration-proof mat.

Sincere Forever
